

About Neighborly

Built for Gated Communities. Inspired by Real Life.

Neighborly was born out of a simple idea - what if everything you needed inside your gated community was just a tap away?

From finding a neighbor to borrow a ladder from, to selling your child's old toys, or booking a trusted yoga trainer down the block - life inside a community should be connected, trusted, and effortless.

That's exactly what we're building.

What We Do

Neighborly is a private digital platform for gated communities - bringing together residents, local sellers, service providers, and RWAs in one secure space.

With Neighborly, you can:

- Stay updated with community news & events
- Buy and sell items inside your society
- Discover or promote local services
- Interact with real, verified neighbors only
- Run and manage your community smarter

Why Neighborly?

Because social media is too noisy.

Classified sites are too risky.

Group chats are too messy.

Neighborly is your community's own digital hub - designed with privacy, trust, and usefulness at its core.

Our Vision

To help every gated community in India and beyond feel more connected, more trusted, and more self-reliant.

We believe communities are stronger when neighbors interact, support each other, and grow together.

Who It's For

About Neighborly

- Residents - Engage, trade, and participate
- Home-based sellers - Sell goods within trusted circles
- Service providers - Promote your work to the right people
- RWAs/Admins - Streamline approvals, verifications & announcements

Where We're Starting

We're proudly built in India - and launching first in Hyderabad, one community at a time.

Join Us

Neighborly is currently onboarding select gated communities.
